TB skin test? Yes _____ No _____

Chest X-ray? Yes_____No _____

Chest X-ray result: ____

Did you receive treatment? Yes _____ No_____ If yes, type of treatment: ____

PATIENT INSTRUCTIONS:

A TB skin test is given to screen people for tuberculosis. A reaction to this test does not necessarily mean that you have tuberculosis. It is important however to have the test site examined within the timeframe of 48 to 72 hours. If it has been more than 72 hours since the test was administered, the test will have to be repeated and you may be responsible for the cost of a repeat test.

DO NOT put a bandage or lotion on the test site. It is okay to get the site wet but do not wipe or scrub the test site. If it itches, you may put a cold compress on the area.

Your test will not be read before (date/time):_______________________ (am/pm) or after (date/time):______________________ (am/pm).
